

Validation strategies	88
→ Comparison with other measures	54
→ Correlation with anchor	41
→ Sequence similarity	14
→ Gene co-expression profiles	9
→ Manually assigned similarity	4
→ Classification-based similarities	14
→ EC similarity	7
→ Pfam similarity	7
→ Resolution	5
→ Clustering	8
→ Classification prediction	27
→ Protein pair classification	19
→ Protein-protein interaction	17
→ All interaction types	8
→ Physical interaction	1
→ Part of the same complex	3
→ Part of the same pathway	3
→ Orthology protein detection	1
→ Targets to the same drug	1
→ Single protein classification	8
→ Function prediction	6
→ Biological process prediction	1
→ Sub-cellular location prediction	1
→ Contextual behaviour	6
→ Same EC vs. distinct EC	1
→ Same Pfam family vs. distinct Pfam family	1
→ Same pathway vs. distinct pathway	2
→ Adjacent vs. non-adjacent within a pathway	1
→ Interacting pairs vs. random pairs	1
→ Theoretical validation	1
→ Perturbation analysis	1
